## Four Steps for Performing Infusions:

Practice good hand-washing **1**    Prepare supplies **2**    Disconnect and Flush **3**    De-Access Port **4**

### STEP 1: PRACTICE GOOD HAND-WASHING

- Always remember to **WASH YOUR HANDS** for a full 20 seconds when instructed.

### STEP 2: PREPARE SUPPLIES

- Check through the carry bag to be certain your infusion is complete. If it is not, wait a little longer and/or contact your pharmacy for direction.
- WASH HANDS.**
- Clean workspace with cleaning solution (alcohol/sanitizing wipes or Lysol + paper towels). **WASH HANDS.**
- Gather supplies: 2 pairs chemo gloves; chemo gown; 1 clear hazard zip lock and 1 large hazard bag; 4 alcohol pads; 1 saline syringe; chemo sharps container; 1 regular trash bag. **WASH HANDS.**
- Prepare supplies: Unwrap saline, remove bubbles; all other items within hands reach.
- Have a trash bag ready for your regular garbage disposal.

### STEP 3: DISCONNECT AND FLUSH

- WASH HANDS.** Put on Chemo gown, Put on two (2) pairs of gloves. Gown cuffs over gloves
- Remove pump from carry bag to assess completion and apply all clamps.
- Remove the tape from thermoregulatory. Disconnect the blue end cap from the tubing and dispose of the used elastomeric device in the chemo sharps container.
- Scrub the hub and flush the blue end cap with normal saline in pulsatile fashion. Discard in garbage.

### STEP 4: DE-ACCESS PORT

- Expose the insertion site of the needle by removing the dressing. Be careful not to move the needle a lot.
- Anchor the port with two fingers of one hand and pull the needle straight out or pinch the wings together to remove. Place in the chemo sharps container.
- Remove gown and gloves careful not to expel particulate into the air.
- Place gown and gloves in clear zip lock and seal closed.
- Place zip lock in larger hazard bag and seal with zip tie. Place in storage out of the way.
- WASH HANDS.**
