

# Rehabilitation Psychology and Neuropsychology

Our rehabilitation psychology program serves persons with spinal cord injury, stroke, acquired brain disease, trauma, orthopedic and chronic illnesses, as well as amputations and chronic pain conditions. Rehabilitation psychology services are provided for both inpatients and outpatients to improve function and quality of life.

## Our Services Provide Help With

- Psychological functioning
- Cognitive functioning
- Adjustment to recent trauma or impairment
- Development of coping skills
- Family adjustment and coping
- Community reintegration following impairment
- Sexuality
- Substance abuse
- Pain

## About Our Services

Rehabilitation psychology provides both assessment and treatment services to aid patients and their families in coping with physical and cognitive problems, pain and disability. Psychological and neuropsychological evaluations are available as an integral part of our services. Neuropsychological testing evaluates a patient's cognitive functioning in a wide range of domains, such as memory, attention, language and problem-solving skills. We can provide recommendations for patients, families and health care providers on treatment and supervision needs as well as make recommendations regarding occupational issues, driving ability and cognitive capacity.

Cognitive testing is part of a comprehensive evaluation.

Behavioral, cognitive and psychological treatment is provided to help patients and their families in coping with chronic illness and disability.

## Services Include

- Psychological assessment
- Neuropsychological assessment
- Neurorehabilitation program
- Individual behavioral and psychological therapy
- Marital and family therapy
- Education and therapy for intimacy and sexuality issues
- Substance-abuse assessment and referral
- Pain-management skills training

Our psychologists are an integral part of the rehabilitation team and work closely with the patient, physician and other health professionals to ensure the best possible care. Our services are individually tailored to meet the needs of each patient and their family members. All services are provided with a high regard for patient confidentiality.
