

Wound Care at Johns Hopkins

The Johns Hopkins Hospital has trained physical therapists who provide comprehensive wound care services to various patient populations. Our therapists work in close collaboration with other specialists, such as plastic surgeons, dermatologists, lymphedema therapists, certified wound specialists, vascular surgeons and podiatrists.

Types of Wounds Treated Include

- Acute and chronic wounds
- Arterial ulcers
- Bone infections
- Diabetic foot ulcers
- Pressure ulcers
- Soft-tissue infections
- Surgical wounds
- Venous stasis ulcers

Modalities Offered Include

- Compression dressings
- Electrical stimulation
- Pulsatile lavage
- Sharp debridement
- Use of advanced wound dressings and products
- Whirlpool

A physical therapist performs pulsed lavage on a patient with a venous stasis ulcer.

If you have any questions or to make an appointment, please call 410-955-6214 or fax a referral to 410-614-7234.

Please include the following on the referral

- Patient's name
- Date
- Diagnosis
- Modality or type of treatment requested
- Frequency and duration of treatment
- Dressing type and frequency of dressing changes
