Sibley Memorial Hospital

Sibley Memorial Hospital, located in northwest Washington, D.C., has a distinguished history of serving the community since its founding in 1890 by the Woman’s Home Missionary Society of the Methodist Episcopal Church. As a not-for-profit, full-service community hospital, Sibley offers surgical, intensive care, obstetric, psychiatric, oncologic and skilled nursing inpatient services and operates a 24-hour emergency department. Its campus also is home to Grand Oaks, an assisted living residence, and the Sibley Renaissance, which houses the Center for Rehabilitative Medicine, Sibley Senior Services, specialty centers, a skilled nursing care unit and a residential Alzheimer’s unit.

Sibley’s mission is to provide quality health services and facilities for the community, to promote wellness, to relieve suffering and restore health as swiftly, safely and humanely as it can be done, consistent with the best service we can give at the highest value for all concerned.

Sibley is fully accredited by the Joint Commission and licensed by the District of Columbia Department of Heath and Human Resources (DCRA). The Commission on Cancer (CoC) of the American College of Surgeons granted its 2009 Outstanding Achievement Award to Sibley’s Cancer Center.

Part of a Premier Integrated System

Sibley Memorial Hospital is a member of Johns Hopkins Medicine, one of the world’s premier, integrated health systems, with six hospitals, four community-based health care and surgery centers, over 30 primary health care sites throughout Maryland, managed care and home care services, and numerous overseas affiliates and management agreements.

Among Sibley Memorial Hospital’s specialty services are:

**Oncology**
- Offering multidisciplinary cancer care from surgery to radiation oncology to wellness support and access to clinical trials, genetic counseling, palliative care and rehabilitation.
- State-of-the-art technology including digital mammography, breast MRI, intensity-modulated radiation therapy, and TomoTherapy linear accelerator.
- The Sullivan Center for Breast Health, staffed by dedicated breast radiologists, diagnoses and treats more breast cancer than any other medical facility in the Washington, D.C., and Maryland area. The Center has been granted a three-year, full accreditation designation by the National Accreditation Program for Breast Centers (NAPBC), a program administered by the American College of Surgeons.

**Orthopedics**
- Sibley is ranked among the top 100 hospital programs in the country for hip replacement and is a benchmark hospital for successful hip replacement surgeries.
- Over 3,000 arthroscopic surgeries are performed each year.
- An area leader in implementing advanced medical technology in its operating suites, including high-definition video technology, robotics and minimally invasive surgical techniques.
- Non-surgical orthopedic care, including physical therapy, exercise and other rehabilitation services, from Sibley’s Center for Rehabilitation Medicine.

**Obstetrics**
- Obstetric services emphasize the safety of mother and baby, and all aspects of care are addressed from birth preparation to labor and delivery to breastfeeding and newborn care.
- State-of-the-art delivery rooms are equipped for complicated deliveries; three fully equipped operating rooms can accommodate multiple birth deliveries at any time, along with two triage rooms.
- Our family-centered approach is to include the entire family together with siblings in a way that promotes bonding.

**Other Specialty Services**
- The Sibley Senior Association offers a variety of wellness programs for those over 60, including free health screenings, exercise and fitness programs, and presentations by medical experts on important health issues.
- The Sibley Center for Weight Loss Surgery team of multidisciplinary experts provides comprehensive, coordinated care to help obese people lose weight and restore their health.
- The Pain Center provides the latest in minimally invasive treatment options for relieving pain associated with everything from sports injuries to chronic arthritis.
