Committed to Our Communities
Since Johns Hopkins’ founding in the late 1800s, we have upheld our steadfast commitment to serve our communities. We know that as our cities and neighborhoods thrive, so too will we in our long-held mission of education, research and patient care—all for the sake of humanity.

**Thousands of Johns Hopkins students and employees are engaged with more than 500 programs and organizations** working to improve lives and uplift communities in greater Baltimore.

**In fiscal year 2015, Johns Hopkins Medicine provided $335 million in community benefits and care.** The following are two of many examples of how we serve in East Baltimore:

**HOPKINS LOCAL**
BUILD. HIRE. BUY.

Via HopkinsLocal—a program in which we’ve set goals to build, hire and buy locally—The Johns Hopkins University and the Johns Hopkins Health System are helping lead the way to an even more vibrant and prosperous Baltimore.

- **We have committed $20 million** in design, consulting and construction work to minority-owned, women-owned and disadvantaged businesses.
- **40 percent** of targeted positions will be filled by people from the city’s most distressed communities by 2018.
- **$6 million** increase in goods and services will be purchased from Baltimore businesses over three years.
Catalyzed by the HopkinsLocal initiative, 25 Baltimore-area businesses joined together with us to expand existing programs or launch new ones to build, hire, invest and buy locally.

$69 million
into local, minority-owned, women-owned and disadvantaged businesses over three years
Our Regional, National and International Reach
As we carry out our mission of improving the health of our communities and the world, we know that we must do so wherever people need us. With this aim, Johns Hopkins Medicine has expanded to an $8 billion integrated global health enterprise and one of the leading health care systems in the United States.

Helping More Patients
Through agreements abroad, Johns Hopkins Medicine brings excellence in patient care and research in 14 countries (see map). The Johns Hopkins Hospital continues to reach and help new patients in our community and outside of our home base of Baltimore, Maryland.

- **6 member hospitals:** The Johns Hopkins Hospital, Johns Hopkins Bayview Medical Center, Howard County General Hospital, Suburban Hospital, Sibley Memorial Hospital and Johns Hopkins All Children’s Hospital
- **900,000+ annual patient visits** via Johns Hopkins Community Physicians at 40 primary and specialty care practices
- **158,000+ adults and children** in central Maryland treated by Johns Hopkins Home Care Group
- **4,500+ international patients and 5,700+ out-of-state patients** facilitated by Johns Hopkins Medicine International
- **49:** the number of states from which we saw patients last year
Together, Our People Create a Healthier Tomorrow

Thanks to the profound dedication of our nurses, faculty members, physicians and staff members, the future of medicine is forged. Each and every day, our patients’ and their families’ lives are bettered by our care. The unyielding pursuit of excellence in research, education and patient care defines who we are at Johns Hopkins Medicine, and our people are the very embodiment of our mission.

Discoveries That Change Countless Lives
Discovering the cures and innovations of tomorrow isn’t just a legacy at Johns Hopkins Medicine. It’s the driving spirit that propels our medical scientists and clinicians—both those who are here now and those who will serve with us in the future. Whether in our use of federal research funds or in forging novel collaborations to make the next breakthroughs in medicine, our dedication to discovery and innovation for the health of people everywhere is never-ending.

**Johns Hopkins Clinical Research Network**
Partnering with other providers in the mid-Atlantic region, Johns Hopkins Medicine is studying patients beyond its own health system, reaching millions of patients at five community-based hospitals.

**NIH Research Funding**
- $462 million awarded to the school of medicine in 2016
- Among the highest NIH-funded medical schools in the nation

Reaching and Helping More People: Our Digital Approach

We can only help people if they know and understand that we are here for them. One of the most powerful ways we ensure that happens nationally and globally is through our digital communications. As our capacity to treat human illness evolves and expands, our digital approach becomes increasingly important to the health and wellness of more and more people around the world.

Digital Growth: Connecting with and Helping More Consumers

Visits to hopkinsmedicine.org climbed to more than 46 million in 2016, up 11 percent from the prior year.

Johns Hopkins Medicine Social Media by the Numbers

Facebook: 447,968+ followers, up 57 percent from fiscal year 2015

Twitter: 375,000 followers, up 23 percent from fiscal year 2015

YouTube: 7.3 million+ views, 22,000+ subscribers

LinkedIn: 15,000 followers, up 52 percent from fiscal year 2015
Educating Medicine’s Future Luminaries
As our faculty members, clinicians and staff members impart the medical knowledge and wisdom gleaned from our 127-year history, we foster an environment of profound scientific curiosity, rigor and discovery. Our aim: for our students and people to lead the way in improving the health of our communities and the world.

There are currently 591 M.D. candidates.
Fiscal Responsibility for a Better, Healthier World

We deliver care with unyielding commitment and careful understanding of the whole patient and populations, and we apply that same meticulousness to our business. As demand for our services continues to increase across the globe, the greater are our opportunities to realize our mission of improving human health.

Reducing Costs: Supply Chain Initiative

By buying supplies and services jointly instead of individually across Johns Hopkins Medicine, the enterprise saved millions across the system in the second year of our supply chain integration plan.
Improving Patient Safety Around the World

At Johns Hopkins Medicine, patient safety is more than an imperative; it’s a science. And after 127 years of cumulative medical knowledge, we are honored to share with the world our rigorous efforts in quality and safety.

Today, clinicians anywhere can adopt Johns Hopkins-developed checklists to help eliminate preventable harm or collaborate with us via initiatives such as the Comprehensive Unit-based Safety Program (CUSP), which offers caregivers tools to tackle hospital-acquired infections, medication administration errors and communication breakdowns.

CUSP by the Numbers

More than 170 CUSP teams have been activated at Johns Hopkins Medicine, and hundreds more have been organized in hospitals internationally. The results are striking. With CUSP teams and checklists in 1,100 ICUs in 44 U.S. states, bloodstream infections are down by 40 percent in those hospitals, saving 500 lives and $34 million.

We now have patient safety projects in 22 countries. Here are just a few examples of what we are doing to spread our knowledge globally.

- **Uganda**: In collaboration with the World Health Organization, adoption of Comprehensive Unit-based Safety Program for low-resource countries
- **Lebanon**: Hand hygiene support, patient safety training through affiliation with Clemenceau Medical Center in Beirut
- **China**: Comprehensive Unit-based Safety Program, prevention of central line-associated bloodstream infections through agreement with Sun Yat-sen University and affiliated hospitals
- **Chile**: Patient safety conferences, patient safety training, hand hygiene support through agreement with Clínica Las Condes in Santiago
Mission
The mission of Johns Hopkins Medicine is to improve the health of the community and the world by setting the standard of excellence in medical education, research and clinical care. Diverse and inclusive, Johns Hopkins Medicine educates medical students, scientists, health care professionals and the public; conducts biomedical research; and provides patient-centered medicine to prevent, diagnose and treat human illness.

Vision
Johns Hopkins Medicine pushes the boundaries of discovery, transforms health care, advances medical education and creates hope for humanity. Together, we will deliver the promise of medicine.

Core Values
Excellence & Discovery
Leadership & Integrity
Diversity & Inclusion
Respect & Collegiality
Together, we will deliver the Promise of Medicine.
