Vacations: Fellows take 4 weeks vacation/year. Research year Fellows vacations should be scheduled when not on a clinical block. Clinical year Fellows take 1 week during each JHH MICU rotation (CCU fellow provides coverage), 1 week during Consults (other Consult fellow covers) and one during Clinical Physiology (no coverage required but notify PFT staff in advance).

Weekend coverage: Fellows arrange their weekend call schedule. Two fellows are on at JHH each weekend. The 2 MICU fellows alternate call weekends and cover the MICU. The clinical year consult fellow, Onc fellow, and the Special Services fellow cover the floor and oncology services, each on every third weekend. One fellow is on at BMC each weekend, shared between the BMC PCU and MICU fellows. There is no weekend call required of the Clinical Physiology fellow or Research fellows doing clinical blocks.

Holiday coverage: Fellows arrange coverage for the holiday period. Each clinical year fellow gets a 3 day block off, either December 24-26 or December 30- January 1. To avoid unnecessary discontinuities, fellows should arrange weekend call so the fellow on the weekend continues during the contiguous holiday coverage, if possible. For example, a fellow on the weekend of 12/22-23 should cover Christmas, 12/24-26. Two fellows cover BMC and two cover JHH (meaning the Clinical Physiology fellow helps provide holiday coverage). Clinical fellows are expected to cover their regular assigned services on December 27-29. Research year fellows are excused from holiday coverage.

Conferences: Clinical year fellows may attend one national conference (ATS, SCCM, ACCP, etc); please coordinate so that no more than 4 clinical fellows attend the same conference.
