gthornton@jhmi.edu

Our application **deadline** has been extended to

**February 1, 2012**

**Postdoctoral Fellow and Junior Faculty Awards Available**

**2010 Scholars**

Funded by the Johns Hopkins Institute for Clinical and Translational Research (ICTR), the mission of the **CLINICAL RESEARCH SCHOLARS** Program is to develop future leaders in clinical research who are highly trained in clinical research design and methods, skilled in the tools of clinical investigation, and able to work creatively and collaboratively with their colleagues in other disciplines to generate new knowledge to improve health. We do this by providing individuals with rigorous training leading to an advanced degree, helping them to develop and execute a clinical research project, providing mentorship in a multidisciplinary and collaborative research environment and involvement in activities to promote career development.

The **Armstrong Institute for Patient Safety and Quality** has partnered with the ICTR to support a KL2 Patient Safety Scholar. Through this mechanism, we hope to increase the number of researchers well trained in quality improvement and patient safety, and build capacity within Johns Hopkins Medicine.
