Participants Needed for a Research Study on Skin Aging in Ethnic Skin!

Why Should I Join This Study?
Little is known about mechanisms of photoaging and chronologic aging in African-Americans and other black populations. Your participation will help dermatologists understand aging in skin of color, which will help us develop ways of preventing and treating skin aging in this population.

Participation Involves:
- Close-up photographs of affected skin
- Two very small biopsies of your skin in a small percentage of participants

Time Needed for Study:
1st Visit: 30 minutes for photography and two biopsies in small percentage of participants
2nd Visit (if needed): 10 minutes for removal of small sutures

Will I Be Paid to Join This Study?
Yes. $20 per biopsy, $40 total.
