

Appendix D: Physician Information Sheet: TSE/PAD

1. The Authorized Physician Prescriber shall notify:
 - Hospital Epidemiology and Infection Control (HEIC) when a suspected or known TSE patient is identified
 - Nurse manager of the unit when a suspected or known TSE patient is identified
2. If an invasive procedure is scheduled, the Authorized Physician Prescriber shall notify the surgical coordinator and HEIC to ensure proper procedural planning for infection control/prevention measures.
3. The Authorized Physician Prescriber shall ensure that the laboratory is notified when high risk tissue is brought to the lab.
4. If questions regarding care related to a high risk patient with a planned invasive procedure arise questions may be directed to HEIC.
