Appendix A2

Reportable Diseases and Conditions to Hospital Epidemiology and Infection Control (HEIC)

Diseases and Conditions which are to be reported IMMEDIATELY to HEIC:

Anthrax
 Botulism
 Diphtheria
 Glanders
 Measles (rubella)
 Pertussis
 Plague
 Rabies
 Rubella (German measles) and congenital rubella syndrome
 SARS
 Smallpox and other orthopoxvirus infections
 Streptococcal invasive disease, Group A and Group B
 Tuberculosis and suspected tuberculosis
 Tularemia
 Viral hemorrhagic fevers (all types)
 Yellow fever

Diseases and Conditions which are to be reported during office hours to HEIC:

Brucellosis
 Hepatitis, viral (A,B,C and all other)
 Legionellosis
 Mumps (infectious parotitis)
 Poliomyelitis
 Q. fever
 Salmonellosis (nontyphoidal Shigellosis types and undetermined)

Reportable Conditions According to the 1999 Surveillance Definition (all ages);

- a. Persons who are HIV infected **and** exhibit AIDS-defining clinical conditions should be reported as Presumptive AIDS cases by authorized prescribers (and only by authorized prescribers).
- b. Maryland law requires that AIDS case reports include the patient's name. In contrast, only laboratories are to report laboratory evidence of HIV infection. For Laboratory reporting of HIV infection, Maryland law prohibits reporting a patient's name; use the patient's Unique Identifier instead.
