About Our Employees

Intrastaff's recruitment, selection, and placements are customized to match the individual request. We are an Equal Employment Opportunity employer. Our screening of potential candidates includes in-depth interviews, thorough reference checking, skills assessment, pre-employment health screening, including a 10 panel drug screen, education verification, criminal background check in all states and cities in which the candidate has resided, proof of employment eligibility, orientation to Intrastaff and each facility (includes HIPAA training) and all JCAHO requirements.

Many of our employees have previously worked somewhere within the Johns Hopkins Health System.

Performance evaluations are done after initial assignment and periodically during the year. A formal written evaluation is done annually.

Our employees take advantage of the training opportunities and self-tutorial programs we provide throughout the year.

Our administrative staff does regular unannounced site visits to the departments in which our staff are placed. Doing so not only gives us an opportunity to visit our employee at their actual work site, but to also talk with the supervisor or manager and address any issues.
