

POSTDOCTORAL POSITION

Seeking a post-doctoral fellow with interest and experience in mouse models targeting the cardiopulmonary effects of air pollutants. The ideal candidate will have expertise in heart/lung physiology and the biochemistry and molecular biology related to these tissues. We are exploring the roles of aging and genetic susceptibility in exaggerating the public health risk of air pollution exposure.

Successful candidate must be a US citizen or permanent resident. Support for the post-doctoral fellow will include stipend, health insurance and modest travel award.

Current or former cardiology or pulmonary clinical fellows are encouraged to apply. *Possible PhD opportunity combined with fellowship program.

Interested candidates should email CVs to Dr. Clarke Tankersley at ctankers@jhsph.edu
