

**JHU Center for Behavior and Health
Faculty Questionnaire**

Thank you for expressing interest in the CBH. Developing feasible and innovative ways to integrate behavioral science discoveries into Johns Hopkins Medicine that improve patient health and reduce healthcare costs is both a tremendous challenge and opportunity. We need your involvement and your ideas. Please take a few moments to complete the following survey.

Name: _____ Email: _____

Type of Health Care Professional (Include specialty) : _____

Please check your primary Johns Hopkins affiliation.

- | | |
|--|--|
| <input type="checkbox"/> School of Medicine | <input type="checkbox"/> School of Public Health |
| <input type="checkbox"/> School of Nursing | <input type="checkbox"/> Johns Hopkins Community of Physicians |
| <input type="checkbox"/> Johns Hopkins Health Care | <input type="checkbox"/> JHH |
| <input type="checkbox"/> JHBMC | <input type="checkbox"/> Other Facility _____ |

Location (Please check your primary location(s)).

JHH/East Balt JHBMC Home wood Other site _____

Please estimate the percentage of time you are involved in the following activities:

Direct Clinical Service _____ Administrating Clinical Services _____

Conducting Research _____ Teaching _____

Other Executive / High level Administrative or Managerial Functions _____

Please summarize your interests in behavioral health and / or the CBH Mission.

Are you interested in being involved in a CBH Committee? Yes No

If Yes, Please Rank (1-3) your interests:

- a) _____ Curriculum Development (for providers and patients).
- b) _____ Electronic Monitoring and Behavioral Reinforcement (developing behavioral health module for the Hopkins electronic medical record)
- c) _____ Pilot Grant Program and Research Development

Health Behavior Change Programs at Hopkins: A wish list.

The following are some ideas for promoting health-related behavior change at Hopkins.

For the purposes of this questionnaire, “behavioral health” focuses on specific health-related behaviors such as eating (diet), sleeping, physical activity, exercise, smoking tobacco, sexual behaviors, etc that significantly impact both medical and psychiatric diseases. It does not refer to primary psychiatric services for mental disorders, such as depression or schizophrenia, as the term is sometimes more broadly used.

Please rate each idea with respect to its potential for making a sustainable impact on patient care (at Hopkins with potential for broader dissemination) and perceived feasibility to execute at Hopkins. Please use the following rating scales:

Potential for Impact: 0 = Minimal Impact – 10 = Maximum Impact
Perceived Feasibility: 0 = Completely Unrealistic – 10 = Highly Feasible

Note. With respect to feasibility, if substantial financial resources would be needed, please consider the extent to which donors and/or granting agencies/other funding sources would be likely to fund these ideas in the current economic climate.

- 1) Create a Behavioral Health list serve and associated blog (behind the firewall) for the Hopkins professional community with an indexed and searchable problem area archive. This list serve would function as an unmoderated forum open to the Hopkins community for sharing ideas, resources, and information related to behavioral health clinical and research issues.

Impact Score____ Feasibility Score____

Would you be likely to actively participate in this activity at least monthly? Y / N

- 2) Create a web-based, centralized, health behavior referral system to efficiently link Hopkins patients with behavioral health services, clinics and / or individual providers.

Impact Score____ Feasibility Score____

Do you think such a program would be significantly enhanced and worth the added expense, by making it person based (i.e., a live person who answers the phone and connects patients or providers with potential Hopkins / community resources)?

Y / N

- 3) Establish a CBH fund to provide existing Hopkins patients who meet financial and medical needs criteria with financial support to cover existing Hopkins related behavioral health services not paid by insurance

Impact Score____ Feasibility Score____

- 4) Develop specific CME programs targeting common patient health behaviors with an emphasis on training providers how to address these behavioral issues effectively in the context of busy general medical practice.

Impact Score____ Feasibility Score____

- 5) Develop a Tele-Behavioral Medicine Consultation Service (e.g., skype based). This would involve doctoral level behavioral health providers delivering evidence based, brief interventions to Hopkins patients and providing consultations to Hopkins providers.

Impact Score____ Feasibility Score____

Please rate the above idea, if this service involved Master's level behavioral health providers, instead, who were supervised by doctoral level providers.

Impact Score____ Feasibility Score____

- 6) Do you have any ideas for a wish list?

Thank you!!!
