

Take Part in Brain Research

Attention: Parents of Children Ages 5-9 years

We are recruiting children to participate in a research study to learn more about brain differences in children with ADHD.

WHO: Children, ages 5 to 9 years, with or without ADHD

WHAT: One to two days (about 6 to 8 hours) of computer games, paper and pencil tasks, and a Magnetic Resonance Imaging (MRI) of the brain. You will receive both the results of the IQ testing and a picture of your brain. Parents and teachers will complete a telephone screen, questionnaires, rating scales, and a structured interview.

WHERE: Kennedy Krieger Institute and the Johns Hopkins Hospital

BENEFIT/RISK: There are no direct medical benefits or significant risks for participating in this study.

COMPENSATION: \$50.00

CONTACT: Lisa Ferenc: (443) 923-4469

Every child is born with great potential.
Shouldn't every child have the chance to achieve it?
