DO YOU HAVE KNEE PAIN & TROUBLE SLEEPING?

PARTICIPANTS ARE NEEDED for a study to evaluate a new, non-narcotic sleep medication in patients with arthritis of the knee.

Researchers at the **Johns Hopkins School of Medicine** are looking for volunteers to participate in a clinical trial examining the effects of a new sleeping medication used nightly for 3 months on: sleep, pain, and daytime symptoms

- **To participate in this study, you must be:**
  - Between the ages of 18-64
  - Have osteoarthritis of the knee
  - Trouble sleeping for at least 6 months
  - (Insomnia does not have to be related to knee pain)

- **This study involves:**
  - 1 Overnight sleep study
  - May include X - Rays of the knee
  - Sensory testing
  - All examinations, parking, & medication are provided at no cost.

- **Compensation up to $300**

Michael T. Smith, Ph.D., Principal Investigator
