

Immediate Closure of Nelson/Harvey Loading Dock Ramp and Smoking Area

Until further notice the Nelson/Harvey loading dock ramp and the smoking area at the top of the ramp will be closed to all pedestrian traffic. Due to the close proximity of the construction, this area is deemed unsafe for pedestrians. Recently, an incident occurred when a piece of construction debris struck an employee on their head. In addition, an earlier near miss occurred when a piece of concrete fell, but the pedestrian stepped out of the way in time. The use of this area during this phase of the construction poses an imminent hazard to any one walking on the ramp.

The only personnel allowed in this area will be those affiliated with the construction project wearing hard hats. Vehicle traffic will also be permitted at this time. Security personnel will be located at this area to monitor.

If there are any questions please contact HSE at 5 5918
