

JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE COMPENSATION GUIDELINES
STIPEND SUPPLEMENTATION POLICY FOR HOUSE STAFF AND POSTDOCTORAL FELLOWS

I. Chief Resident Supplementation

Supplementation of the stipends of chief residents for administrative duties will be at the discretion of the Training Program Director or Department Director up to a ceiling of 40% of the base PGY-level stipend. Such supplementation must come from non-hospital departmental funds.

(Approved 7/82)

II. Additional Earnings by House Officers and Postdoctoral Fellows

With approval, house officers and fellows are permitted to make additional earnings beyond their PGY stipend level.

This policy applies to services rendered within the Johns Hopkins Institutions that are separately identified from services which are part of the training program. The Training Program Director and the Associate Dean for Graduate Medical Education must approve all requests for supplementation prior to initiation of such activities. **Please note that the number of hours worked by a resident or clinical fellow in internal moonlighting activities, together with the hours worked in the Accredited Johns Hopkins Training Program, may not exceed the ACGME guidelines for work hours for the resident's/clinical fellow's specialty/subspecialty.**

The maximum time permitted for stipend supplementation activities for fellows in non-ACGME accredited training programs is 600 hours per year.

The "moonlighting" form for those in ACGME accredited programs or the "extracurricular" form for those in non-accredited programs outlining the activities, hours, and billing intentions must be submitted to the Associate Dean for Graduate Medical Education for approval. These forms may be found on the Graduate Medical Education Committee website at www.hopkinsmedicine.org/som/gme. In addition, for those activities involving patient care, trainees must hold a valid license to practice medicine in Maryland, and they must apply for and be granted privileges as a contract physician by the institution in which they intend to work.
