

## **I. EVALUATION**

- A. Each program shall maintain an effective plan for assessing residents'/clinical fellows' performance throughout the period of appointment, including during periods of service at affiliated institutions. Assessment shall include competence in patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice, in addition to program specific standards.
- B. Regular and timely feedback shall be provided; this shall include written semi-annual evaluations which are accessible to the residents/clinical fellows and which are used to achieve progressive improvement in competence and performance.
- C. Each program shall collect anonymous evaluations by residents/clinical fellows of the faculty and of the training program in accordance with the ACGME Common Requirements and program-specific requirements. Unless otherwise stated in the Common or Program-specific Requirements, these evaluations shall be performed at least annually, but preferably more frequently. In conducting these evaluations, the GMEC has mandated the use of a GMEC-approved electronic evaluation system, unless the program has presented an alternative which is found acceptable by the GMEC.

## **II. PROMOTION**

Departmental evaluation for promotion shall consider compliance with institutional policies and departmental policies, as well as progress in meeting expected goals in patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice. Academic and performance standards and methods of GME training and evaluation are to be determined by each clinical department and program.

## **III. NONRENEWAL**

If performance is deemed unsatisfactory and attempts at correcting the problem have been unsuccessful, a written notice of non-renewal or decision to delay promotion to the next PGY level shall be provided no later than four months prior to the end of the current period of appointment. However, if the primary reason(s) for the nonrenewal or non-advancement

occurs within the four months prior to the end of the agreement, the program shall provide the resident/clinical fellow with as much written notice of the intent not to renew or not to promote as the circumstances will reasonably allow. A resident/clinical fellow in receipt of a notice of non-renewal is entitled to utilize the Johns Hopkins School of Medicine "Grievance Procedure for Faculty, Fellows and the Student Body".
