Surgical Residency for Physician Assistants

Mission Statement

Our mission is to provide an educational environment whereby the Certified Surgical Physician Assistant is trained in the highest level of patient care.

Training will be provided in clinics, on the surgical floors, and in the operating room and will involve pre-operative, intra-operative, and post-operative care. In an academic environment, the residents will be exposed to basic and advanced surgical training concepts and techniques. Under appropriate supervision the resident will gain the confidence and experience necessary to practice in a wide variety of surgical specialties in academic and private settings.

Residency Description

Residents will rotate through a variety of surgical specialties and undergo intense training in perioperative management and surgical practice, with clinical time bridging between patient management (~75%; inpatient, clinic, consults) and OR time (~25%; position/prep/drape, first assist, second assist). Core rotations include GI, Cardiac, Thoracic, Vascular, Trauma, Endocrine, SICU, elective time, and rotations at JHH affiliated community hospitals.

The Stipend is \$45,000 with twenty-two days of personal time off to be used as vacation or sick time. Meal vouchers for call days will be provided. Health, dental and life insurance as well as short and long-term disability are available. Initial licensing fees will be covered by the hospital. The residency has been approved by the AAPA for 50 Category I CME credits. Additional opportunities to earn Category I and II CME credits are also available throughout the year.

Qualified applicants must meet the following:

- Graduate of accredited PA Program
- Minimum GPA of 3.4 is recommended
- Masters or Doctorate Degree or commensurate work experience
- Eligible to sit for PANCE
- Possess the desire to learn and be self-motivated
- Completed application process (application and fee, letters of recommendation, and personal essay)
- Be available for an interview

Minimally Invasive Surgical Training Center (MISTC)

Basic Education

- Initial didactic, clinical, and laboratory orientation
- PA Residency lecture series
- Intern and Resident weekly lectures
- Service-based specialty lecture content
- Guest Speakers
- Grand Rounds
- Minimally Invasive Surgical Training Center (MISTC) – Monthly hands-on lab experiences with surgical staff for training in basic and advanced surgical skills.
- Simulation Lab
- Conferences
- Faculty mentorship – Residents will meet with faculty throughout the year for feedback and performance evaluations.

Physician Assistant Surgical Residents will follow guidelines established by the Accreditation Council for Graduate Medical Education: Surgical Residents are limited to 80 hours a week (averaged over 4 weeks). They must have 10 hours off duty between consecutive work periods. Call can not exceed every third night. Residents will have one day in seven free from all educational and clinical responsibilities averaged over a four week period, inclusive of call. Meal vouchers will be provided when on call.

A Certificate through the Johns Hopkins Hospital will be awarded after successful completion of a twelve-month residency.
