Post-Graduate Critical Care Residency for Physician Assistants

The Johns Hopkins Hospital
Baltimore, Maryland

Postgraduate Critical Care Residency for Physician Assistants

Our mission is to provide an educational environment whereby the Certified Physician Assistant is trained to the highest level of proficiency and critical-thinking in the skills required to provide multi-disciplinary care to critically ill patients.

Training will be provided in the Intensive Care Units and affiliated departments of The Johns Hopkins Hospital and The Johns Hopkins Bayview Medical Center, and will include management of acutely or critically ill patients requiring intensive monitoring and medical management. In this academic environment, Critical Care PA residents will collaborate with a team of practitioners to apply basic and advanced physiologic concepts and technology in an evidenced based practice. PA Residents will work with experienced PAs, Nurse Practitioners, Critical Care Medicine Fellows, Attending Physicians, and Residents. Throughout the year, the PA Resident will develop in their ability to be the primary provider for critically ill patients, present the patient to and determine the plan of care with the ICU team, and become proficient in the skills and procedures necessary for comprehensive management of critically ill patients.

Residency Description

Residents will rotate through any or all of the following Adult Intensive Care Units: Surgical (General Surgical, Neurosurgical, Cardiac), Burn, and Medical ICU. Additional time will be spent in the ED and on specialty services, such as Renal and ID. Residents will rotate through both the academic tertiary care hospital (JHH) and academic community-based hospital (Bayview Medical Center). In doing so, they will care for critically ill medical and burn patients, as well as patients following Neuro, Trauma, GI, Thoracic, Transplant, Vascular, Plastics, and Cardiac Surgery. The residency has been approved by the AAPA for 50 Category I CME credits. Additional opportunities to earn Category I and II CME credits are also available throughout the year.

Qualified applicants must meet the following:

- Graduate of accredited PA Program
- Minimum GPA of 3.4 is recommended
- Masters or Doctorate Degree or commensurate work experience
- Eligible to sit for PANCE
- Possess the desire to learn and be self-motivated
- Completed application process (application and fee, letters of recommendation, and personal essay)
- Be available for an interview

Basic Education

- Initial didactic lectures and orientation
- PA Residency lecture series
- Simulation Center Laboratory/Minimally Invasive Surgical Training Center – Monthly labs specifically designed for the development of skills and critical thinking
- Departmental Resident Lectures for Anesthesia and Surgical Residents
- Specialty lectures
- Guest Speakers
- Grand Rounds
- Morbidity and Mortality Rounds
- Conferences
- Faculty mentorship – residents will choose a faculty mentor with whom they will meet throughout the year.

Physician Assistant Critical Care Residents

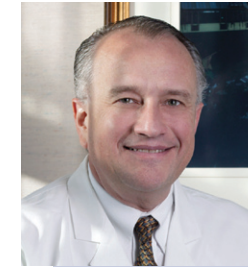

will follow guidelines established by the Accreditation Council for Graduate Medical Education: Critical Care Residents are limited to 80 hours a week (averaged over 4 weeks). They must have 10 hours off duty between consecutive work periods. Call cannot exceed every third night. Residents will have one day in seven free from all educational and clinical responsibilities averaged over a four week period, inclusive of call. Meal vouchers will be provided when on call.

A Certificate from Johns Hopkins Hospital will be awarded after successful completion of the twelve-month Postgraduate Critical Care Residency for Physician Assistants.

The Johns Hopkins Simulation Center is a state-of-the-art training facility now offering specialized instruction and training for residents, students, and staff.

Faculty

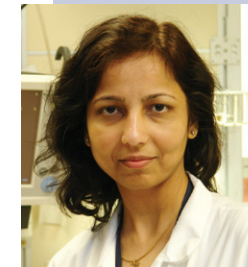

We are committed to helping you obtain the skills and experiences you require to succeed in the critical care environment.
