

Healthy Volunteers Needed For Skin Research Study

- ✓ Must be Caucasian between 18-50 years of age;
- ✓ Have healthy normal skin
- ✓ Willing to undergo skin biopsy procedures to the buttocks

We are studying skin aging and the molecular changes in skin when exposed to ultraviolet (UV) light.

Study participation involves:

- 3 on-site visits over 3 weeks
- One-time exposure to artificial UV light
- 6 skin biopsy procedures

Eligible participants will be compensated \$150 for completion of the study.
