

Checklist before implementing a nursing-based antibiotic stewardship intervention:

- Meet with nurse manager to ensure proposed intervention is relevant to the unit

- Garner support from:
 - Nursing director (if required by local hospital policy)
 - Physician/advanced practitioners leader
 - Bedside nurses

- Identify bedside nurse champion responsible for promotion of the intervention and to serve as liaison between nurses and the AS team

- Identify physician champion to provide education to nurses

- Identify and resolve any conflicting protocols that may interfere with proposed intervention

- Determine how you will meet with nurses to discuss algorithm and/or perform education

- Obtain Institutional Review Board approval if required by local policies or plan to collect data for publication
