

Vaginoplasty with canal:

If you are undergoing a vaginoplasty with canal, hair removal is necessary. Template provided below. We recommend you start hair removal as soon as possible, as it can take up to 12 months to complete.

Vaginoplasty Hair Removal Template

Area 1: Shaded in blue: Entire scrotum and penile shaft

Area 2: Shaded pink triangular region: Groin and perineum, all skin more than 1cm from groin crease (beginning at the top of the penile shaft and ending 2cm above the anus)

Timeline:

Before surgery

Your last session should not be within 3 weeks of surgery.

After surgery

You will not be able to resume hair removal within your new vaginal canal after surgery. If you do not complete hair removal prior to surgery, the remaining hair will continue to grow within your new canal.
