JOHNS HOPKINS MEDICINE

Approved November 13, 2020

CTCL patients are needed for a Cutaneous Lymphoma Database

Participation Requires:

- Cutaneous T Cell Lymphoma patients with a confirmed or suspected diagnosis of Mycosis Fungoides or Sezary Syndrome
- Adult Patients (18+)
- Pediatric Patients (aged 6-17)

Participation Involves:

1 clinic visit (~60 minutes) including:

- Skin exam
- Skin swabbing
- Skin photographs—will be de-identified
- Other possible collection methods: skin biopsies (adults only), blood, stool, buccal swabs, tape stripping, hair and/or nail samples
- Completion of surveys/questionnaires
