

# Participants needed for a skin research study

Volunteers with diagnosed **itchy skin** conditions  
individuals without itchy skin conditions are  
needed for a research study investigating the cause  
and process of itch in the skin

## Who is eligible to join ?

- 18 years or older
- Experiencing moderate to severe itch in the past 24 hours with a diagnosis of an itchy skin condition such as eczema (atopic dermatitis), prurigo nodularis, psoriasis, etc.
- No itch and interested in volunteering as a healthy control

Participation involves: 2 skin punch biopsies, blood draw

Study duration: 1 visit (~ 45 minutes) plus optional suture removal

**\*Participants will be compensated for participation\***
