Books, Textbooks [BK]

1. **Chisolm M**, Lyketsos C. Systematic Psychiatric Evaluation: A Step-by-Step Guide to Applying the Perspectives of Psychiatry. Johns Hopkins Univ Press: Baltimore. 2012. ISBN-13: 978-142140702. *I was responsible for preparing the first draft of each chapter and leading all authorship duties, from prospectus submission through proof review and marketing. This title has been translated into Japanese and a Japanese publisher, Misuzu Books, is currently considering the book for publication. It is used at the University of Iowa and George Washington Schools of Medicine, in addition to our own. It has sold nearly 2,000 copies as of 1/1/17 and Johns Hopkins University Press is launching a renewed marketing campaign, as it has now been well reviewed in peer-reviewed journals, including Am J Psychiatry: “A well-presented, compact summation of McHugh and Slavney’s four perspectives. Faithful and concise, the descriptions are intended to formulate practical, diagram-based steps in the conceptualization of each perspective.”*
2. **Chisolm M (ed)**. Social Media in Medicine. Routledge Taylor Francis Group: Oxford. 2016. ISBN-13:978-1138665385.
3. **Chisolm M**. Flourishing: The Johns Hopkins Approach to Mental Well-being and Happiness (working title). Johns Hopkins Univ Press, advance contract. *From the two readers’ reports:*
 1. “I am well acquainted with Dr. Chisolm from professional contacts over many years. She has a long and productive career in both clinical care and education, is broad-minded in her understanding of patients and the full range of issues and concerns that fill their lives. She is thoughtful in her approach to these issues and is well versed in the Perspectives and how to utilize it in clinical settings. I doubt that any professional colleagues would question her qualifications and I suspect that her reputation will enhance the viability of the book and likelihood that they will recommend it to patients.”
 2. “The inclusion of family members as a target audience is particularly noteworthy, as families often struggle in silence with their loved one’s mental illness. Reading examples of patients who have learned to flourish despite psychiatric illness could be very inspiring and hopeful for families.”

CLINICAL ACTIVITIES

Clinical Focus

My clinical focus has been on the care of pregnant patients with addiction and other psychiatric conditions. In

2010, I was inducted into the Johns Hopkins Miller-Coulson Academy of Clinical Excellence and am sought out nationally for my clinical expertise, as evidenced by my role as the sole behavioral health consultant for a opioid-dependent maternal medical home initiative in Ohio (which is now recognized nationally as a best practice) and an invited contribution to a book on opioid use in pregnancy; as well as for my expertise in psychiatric care of pregnant women in general, as evidenced by the *British Medical Journal* invited review on psychiatric medication during pregnancy.

Clinical Productivity

2006-present My targeted clinical effort in my faculty practice clinic and on the inpatient psychiatric unit is 15%.

Clinical Draw from outside local/regional area (reflecting national/international reputation)

2006-present I primarily treat members of the Johns Hopkins Medicine community (i.e., faculty/staff and their family members) with weekly-monthly individual psychotherapy, although I also draw patients for evaluations and less intensive treatment from other states, such as DC, WV, PA, FL, WI, and RI.

Membership in or examiner for specialty board Not applicable

Clinical Program Building / Leadership

2006-2009 As Director of Psychiatry for the Center for Addiction and Pregnancy (CAP), I designed and implemented:

- A psychiatric triage screening tool for all patients
- Thrice-weekly multi-disciplinary rounds for all patients living on the Assisted Living Unit
- Required psychiatric evaluation of all patients
- CAP as an outpatient training site for medical student clerkship in psychiatry, PGY-1 resident outpatient substance abuse rotation, and PGY-4 Chief Resident departmental clinic
- Quarterly psychotropic medication chart audits, with appropriate follow-up

2009-2010 As Co-Medical Director and Director of Psychiatry for the Center for Addiction and Pregnancy, I - along with an obstetrics and gynecology co-medical director - developed and implemented a truly multi-disciplinary approach to the care of drug-dependent pregnant patients and their children. As part of that approach, I co-led a strategic planning process and participated in biweekly senior staff meetings, monthly operations meetings, quarterly research planning meetings, and consultation rounds within CAP's Cornerstone research program. When compared to women registered at Labor and Delivery with no prenatal care and urine toxicology screens positive for illicit substances, enrollment in the Center for Addiction and Pregnancy was associated with improved infant mortality (saving an estimated 5 infant

lives for every 100 women enrolled).

Clinical Demonstration Activities to external audience, on or off campus

- 2007 Center for Addiction and Pregnancy, visiting delegation of SAMHSA officials, Johns Hopkins Bayview
- 2008 Center for Addiction and Pregnancy, visiting delegation of >25 addiction clinicians, researchers, patients, and policy-makers from the government of Norway, Johns Hopkins Bayview
- 2009 Center for Addiction and Pregnancy, visiting delegation of nurse midwives from Australia, Johns Hopkins Bayview
- 2009 Center for Addiction and Pregnancy, visiting delegation of Humphrey addiction fellows Humphrey Fellows, Johns Hopkins Bayview

Development of nationally/internationally recognized clinical standard of care

The Center for Addiction and Pregnancy, with its multi-disciplinary approach to the management of substance-using pregnant women and their infants, is internationally recognized as establishing the standard of care for this population. I was the Center's first Director of Psychiatry and – based on this clinical experience and associated scholarship - am recognized as one of the country's leading experts in the evaluation and treatment of co-occurring mental health conditions in pregnant women with substance use disorders.

EDUCATIONAL ACTIVITIES

Educational Focus

My educational focus has been on the use of digital technology—particularly social media—as it relates to the teaching of humanistic medical practice. My work has helped move the field from its initial exploratory phase into an area of serious scholarship. I am sought out for my expertise, as evidenced by the invitation to join the Organizing Committee for 'The Doctor as a Humanist' International Medical Humanities Project, supported by faculty from the Sechenov Medical University (Russia), Pompeu Fabra University (Spain), Queen's University (UK), and Johns Hopkins University (USA). In addition, I was invited to join the Symposium Organizing Committee – as treasurer - for the project's inaugural 'The Doctor as a Humanist' International Symposium (Spain), and to present talks/workshops (UK, Italy, Finland). I have mentored over 65 individuals from around the world, with substantial recognition for my mentees—via awards, conference presentations, competitive research funding, and >100 publications (at least half with mentee as first-author).

Educational Program Building / Leadership

- 10/06-7/16 Education director (50%), Johns Hopkins University School of Medicine. In my capacity, I was responsible for directing medical student, intern and chief resident, joint intern-postdoctoral fellow, and faculty educational activities within the psychiatry department at Bayview.
- Examples of activities include:
- Developing Bayview Acute Psychiatric Unit (APU) as site for medical student clerkship in psychiatry
 - Revising the curriculum and instituting measurement tools to assess learning outcomes
 - Developing and providing direct mentorship for scientific scholarship
 - Developing Bayview as a site for a 3-month clinical, administrative, teaching, and research rotation for all 4 PGY4 chief residents
 - Developing and administering annual teaching award for Bayview psychiatry faculty
- Examples of scholarship include:
- *Posporelis S, Sawa A, Smith G, Stitzer M, Lyketsos C, Chisolm M. Academic Psychiatry. 2014*
 - *Leonpacher A, Chisolm M. Mentored Writing: an arts-based curriculum for first-year psychiatry residents. Academic Psychiatry. 2016*
- 9/13-present Founder and faculty facilitator, The Maudsley-Johns Hopkins Reading the Mind Book Group, Johns Hopkins University School of Medicine. In my capacity, I am responsible for having developed this collaboration with the Maudsley Hospital's Reading the Mind Book Group, thereby providing an extracurricular educational experience for all psychiatry trainees and faculty in the department at Bayview and Johns Hopkins Hospital. Interested trainees and faculty members meet every 6-8 weeks in my home to discuss a book of theoretical and/or historical interest to the field of psychiatry. The use of a variety of social media tools allows the Hopkins branch participants to engage with those at the Maudsley branch, as well as to engage with learners from both institutions and general public who do not attend in person.

Examples of scholarship include:

7/15-present Associate Director (50%), The Paul McHugh Program for Human Flourishing, Johns Hopkins University School of Medicine. This educational program's vision is to achieve more humanistic clinical practice relevant to human health and flourishing. The Program will also train and mentor future leaders in humanistic clinical practice, human flourishing, and humanistic healthcare curriculum development. In my capacity, I am responsible for:

- Budgetary planning and management
- Assembling External and Internal Advisory Councils
- Articulating a vision and mission
- Developing website content
- Meeting with small groups of medical students and faculty to explore potential content and processes of potential educational activities
- Developing an online resource for promoting arts-based clinical teaching of humanistic practice on a global scale

Examples of scholarship include:

- "Bedside Education in the Art of Medicine (BEAM)" workshop presentations at Mayo Clinic 2016 Humanities in Medicine Symposium, Phoenix, AZ; Stanford Medicine X / ED 2017, Palo Alto, CA; and Academy for Professionalism in Health Care 5th Annual Meeting, Chicago, IL

2/16-present Vice Chair for Education (30%), Department of Psychiatry and Behavioral Sciences, Johns Hopkins University School of Medicine. In my capacity as the inaugural Vice Chair for Education and the first female Vice Chair in the history of the department, I am responsible for leading the department towards a more systematic approach to the preparation of students, residents, and fellow for careers that further psychiatric research, education, and clinical endeavors.

2/17-present Organizing Committee member, 'The Doctor as a Humanist' International Medical Humanities Project, supported by faculty from Sechenov Medical University (Russia), Pompeu Fabra University (Spain), Queen's University (UK), and Johns Hopkins University (USA). This global project aims to reintroduce to medical education the mission of cultivating commitment, intellectual curiosity, emotional honesty, social awareness, and the exercise of sound judgment and moral imagination – virtues and skills indispensable to good doctoring - and thus to counteract the ever-increasing over-dependence on technology. In my capacity, I am co-responsible for:

- Directly teaching Russian medical students to read works of literature, and reflect on how they deal with medicine, disease and health
- Enhancing the medical students' sensitivity to the cross-cultural issues in the medical profession
- Creating an International Medical Humanities Society (comprised of medical students and working professionals) involving different countries, which will serve as a platform for scholarly collaboration and professional development
- On Symposium Organizing Committee - as treasurer - for the First Annual 'The Doctor as a Humanist' International Symposium, 10/17 in Palma de Mallorca, Spain

10/17-present Development Team member and Regular Contributor, CLOSLER: Moving Us Closer to Osler, A Miller Coulson Academy of Clinical Excellence initiative. Officially launched in March 2018, this web-based project aims to support an international learning community focused on sharing thoughtful clinical stories and perspectives to stimulate reflection about providing exceptional care to every patient. In my capacity, I am co-responsible for:

- Articulating the vision, mission, objectives, and evaluation metrics of CLOSLER website
- Working with the consulting design firm to establish the CLOSLER website design and brand
- Creating original content (e.g., blog posts, questions of the week) for the CLOSLER website
- Engaging faculty and mentoring learners in creation of original content
- Engaging international learning community participation in CLOSLER

1/18-present Director, The Johns Hopkins Psychiatry Education Fellowship Program. This one-year training program provides training in becoming a clinician of distinction, as well as in developing and sustaining educational scholarship, thus laying the foundation for an academic career as a clinician educator. More

specifically, the goals of training are to: advance knowledge as to how to achieve and demonstrate distinction as a “go-to” doctor and further develop skills in clinical care excellence; hone skills in the teaching of psychiatry trainees; build administrative skills in the realm of psychiatry education; and provide foundational training in the conduct of educational research in psychiatry. The Program’s inaugural fellow (mentee Anne [Leopacher] Walsh) will begin her fellowship in July 2018.

3/18-present Founding Scholar and Director of Psychiatry Academy of Clinician Educators (PACE). The mission of PACE is to develop and support clinical faculty members who execute and advance the educational mission of the Johns Hopkins Department of Psychiatry and Behavioral Sciences (DPBS) on the Bayview campus with the ultimate goal of improving patient outcomes. Our mission is rooted in the core values of community, advocacy, clinical service, teaching, innovation, and dissemination. The Academy’s mission is to promote an educational climate that accelerates advances in DPBS teaching and learning, champions clinician educator careers, and improves health. The Academy will be an indispensable crucible for innovation in education, by fostering development of effective and novel curricula. It will also be an essential resource for career development in education, by promoting and rewarding teaching excellence. In addition, the Academy will serve as an important source for pedagogical scholarship, by encouraging and nurturing scholarly work, and provide a vital voice for DPBS clinician-educators at Johns Hopkins and beyond, by enhancing the status of clinician-educator faculty.

RESEARCH ACTIVITIES

Research Focus

My scientific research focus has been on addiction and co-occurring disorders, especially during pregnancy, for which I have been recognized independently of my initial mentor (Dr. Hendree Jones), as evidenced by the ongoing invitation to participate in the Program Committee for the International Women’s and Children’s Health and Gender Conference and the invitation to chair the Media Committee for the College on Problems of Drug Dependence (CPDD), the oldest and largest organization in the USA dedicated to advancing a scientific approach to substance use and addictive disorders.

Research Program Building / Leadership

- 10/06-07/16 Director of education in division of psychiatry at Bayview, Johns Hopkins University School of Medicine. I was responsible for building a division-wide psychiatric trainee research program aimed at equipping the next generation of top-tier clinicians with essential core knowledge about academic research careers and how to design, execute and interpret research studies in medicine. In my capacity, I designed multiple courses and provided direct teaching - as well as 1:1 scientific, clinical, and educational scholarship mentorship - to multiple trainees.
- 5/07-4/12 Faculty for Immersions in Drug Abuse Research program, Johns Hopkins University School of Medicine. I was responsible for providing direct teaching - as well as 1:1 clinical research scholarship mentorship - to multiple trainees, including many under-represented minorities from a variety of educational backgrounds and geographic regions.
- 2/16-present Vice Chair for Education in department of psychiatry and behavioral sciences, Johns Hopkins University School of Medicine. I am responsible for building a department-wide psychiatric trainee research program aimed at equipping the next generation of top-tier clinicians with essential core knowledge about academic research careers and how to design, execute and interpret research studies in medicine. In my capacity, I designed multiple courses and provided direct teaching - as well as 1:1 scientific, clinical, and educational scholarship mentorship - to multiple trainees.

SYSTEM INNOVATION AND QUALITY IMPROVEMENT ACTIVITIES

System Innovation and Quality Improvement efforts within JHMI:

- 1/06-12/10 Faculty Leader, Center for Addiction and Pregnancy Psychiatry Quality and Safety Program. I was

responsible for examining 35 patient records, yielding 46 separate reviews of 4 providers (2 psychiatrists, 1 perinatologist, 1 obstetrical nurse practitioner). 10 charts failed the documentation requirements: 6 lacked documentation of pertinent therapeutic monitoring, 1 lacked documentation of adverse effects of new medications, 1 lacked documentation of rationale for medication change, and 1 lacked documentation of rationale for high-dose/multiple medications. On the basis of this project, the existing psychiatry evaluation and follow-up forms were replaced with new forms to include prompts for documentation of these items. In addition, all Center for Addiction and Pregnancy psychiatrists and obstetrical providers were educated about the importance of such documentation, and psychiatrists were educated about how to complete the new forms and obstetrical providers were educated about how to document these items in the QS electronic medical record system.

System Innovation and Quality Improvement efforts outside of JHMI:

2014-2016 As the sole behavioral health consultant for the Health Services Advisory Group Incorporated, I developed and reviewed all behavioral health protocols for the Maternal Opiate Medical Supports (MOMS) Project. This 2-year quality improvement initiative -sponsored by the Office of Health Transformation, Ohio Department of Mental Health and Addiction Services, and Ohio Department of Medicaid - sought to improve maternal and fetal health outcomes, improve family stability, and reduce costs of neonatal abstinence syndrome by providing treatment to pregnant mothers with opioid dependence during and after pregnancy through a maternity care home model of care in the state of Ohio. *The National Governor's Association for Best Practices (NGA) recently completed a competitive application process for states to participate in a new project – Addressing Maternal Opioid Use Disorders to Prevent and Reduce the Effects of Neonatal Abstinence Syndrome. Five states have been selected (Alaska, Arizona, Missouri, Rhode Island, and West Virginia), and the MOMS Project will serve as the best practice for other states.*
