

Clinical Associate Training

Title: Clinical Associate Training
Duration: January 2005 – March 2005
Training Provider: Caroline Center
Learning Objective: This training prepares employees to perform a variety of patient care activities including but not limited to: nutritional support, patient mobility, observing & monitoring patients' conditions, and recording information.

This position is considered the entry level position into the Nursing career ladder at the Johns Hopkins Hospital. Participants eligible to participate in this training must have a current C.N.A. certification and at least nine months of acute care experience in a hospital. Participants conduct the classroom portion of the training full-time, and then work in their assigned units in the hospital. The Nursing Department coordinated the unit assignment and placement of these participants.
