

### Order Wisely: Breast Imaging

Learn about recommended imaging exams for palpable breast lumps or breast pain and when to order an ultrasound, MRI, or biopsy for further evaluation of any findings. A table of useful breast imaging IMG codes for ordering in Epic is also available for reference.

### Watch a Breast Imaging Radiologist Discuss Breast MRIs

Dr. Emily Ambinder [discusses](#) when to order a breast MRI for your patient with case examples describing MRI findings, biopsy results, and treatment responses. She also covers routine screening for silicone implant ruptures, and a brief summary of breast MRI research.

### Q&A on Screening Mammography Guidelines

Watch a two minute video that summarizes the latest recommendations on screening mammography and the importance of knowing a patient's lifetime risk for breast cancer.

### Patients Can Schedule Screening Mammograms Online

Did you know that patients can log into MyChart to schedule their screening mammograms? They can choose from a wide array of dates, times, and locations. Additional imaging exams can also be scheduled through MyChart, including ultrasound, CT, DXA, and X-ray.

### Ask Our Medical Director: Dr. Jenny K. Hoang, M.B.B.S., M.H.S., M.B.A.

**Q:** I have a patient who has had 3 years of stable follow-up diagnostic mammograms after a breast cancer diagnosis. Are there any changes to the appointments?

**A:** Yes, your patient now qualifies for screening mammogram appointments instead of diagnostic mammograms. If they are stable after 3 years, they are considered to be lower risk and can take advantage of more appointment options and online scheduling. We will take care of notifying the patient of this during their diagnostic mammogram appointment and answer any questions they might have about the transition. [Here is the informational document we will provide the patient.](#)
