

# JOHNS HOPKINS

## MEDICAL IMAGING

### Comprehensive Cardiac Imaging

We are committed to providing excellent patient care while utilizing state-of-the-art equipment and the latest in software. All cardiac images are reviewed by Johns Hopkins radiologists who are subspecialty trained in cardiac imaging.

#### Cardiac CTA:

- Our fleet of cardiac CT scanners are all 128 slices or above, acquire slices as thin as 0.5-.6 mm, handle a weight capacity up to 300 pounds, and provide a large bore of 78 cm.  
*Note: Patients at or over 300 pounds can be imaged at The Johns Hopkins Hospital.*
- Studies are optimized to evaluate the extent and severity of plaque within the coronary arteries.
- All CT scans are performed by specialty-trained technologists who work exclusively in CT
- Patients can schedule online and pick their own date, time, and location at MyChart.

#### Cardiac CT Calcium Score:

- This important risk marker for cardiovascular health is a quick and easy 10-minute scan that is performed without contrast or IV placement.
- Without insurance, this exam is \$75 out-of-pocket at Johns Hopkins Medical Imaging sites.
- Patients can schedule online and pick their own date, time, and location at MyChart.

#### Cardiac MRI:

- Our 1.5T MRI offers a 70cm wide bore with a 500 pound weight capacity, noise-reducing technology, and feet-first or head-first options for patient entry.
- Exams can be performed for evaluation of ischemic and non-ischemic cardiomyopathy.
- All MRI scans are performed by specialty-trained technologists who work exclusively in MRI.
