

JOHNS HOPKINS MEDICAL IMAGING

Amyloid Brain PET/CT: New Location

We're excited to share that Amyloid Brain PET/CT exams will now be available at our Green Spring Station location in Pavilion I, Suite 130.

Green Spring Station offers free parking, first floor access, and the same nuclear medicine radiologists interpreting the exam as other JHM locations. Our team is actively working to bring Amyloid Brain to our Bethesda location.

Ordering for Community Providers

Please state on your order if the patient is being evaluated for anti-amyloid therapy.

Once our team receives the order via fax at 443-451-6986, they will call the patient to begin the scheduling and pre-authorization process.

Ordering for Johns Hopkins Providers

When ordering via EPIC, please accurately answer the question regarding evaluation for eligibility to receive anti-amyloid therapy.

A screenshot of an EPIC form with an orange border. It contains a question: "Is the patient being evaluated for eligibility to receive anti amyloid therapy for Alzheimer's disease?" Below the question are two buttons labeled "Yes" and "No", followed by a text input field.

Then select "Greenspring Radiology" as the Resulting Agency to route this to our work queue. Our team will then call the patient to begin scheduling and pre-authorization.

A screenshot of an EPIC form with an orange border. The title is "PET/CT Amyloid Brain". The "Resulting Agency:" dropdown menu is open, showing a search bar with "REENSPRING RADIOLOGY" entered. Below the search bar is a table of agency options:

ID	Name	Address	City
1590000630	GREENSPRING RADIOLOGY		
1590000019	JHH RADIOLOGY		

A mouse cursor is pointing at the "GREENSPRING RADIOLOGY" row.

Clear Results, Compassionate Care
