

JOHNS HOPKINS MEDICAL IMAGING

PET/CT at Bethesda

We are excited to announce that the new PET/CT scanner at Johns Hopkins Medical Imaging in Bethesda will be open in early April 2025.

By utilizing this groundbreaking technology, we look forward to continuing to provide you and your patients with faster and improved advanced PET/CT scans. All PET/CT scans are read by Johns Hopkins sub-specialists who are leaders in this field and excel at oncologic and central nervous system imaging. Our technologists are exclusively trained in PET/CT and know how to best leverage clinical nuclear medicine.

Clinical Capabilities:

- 78cm wide bore opening.
- The first PET/CT with 100% coverage of sensors allowing for faster scans at a lower dose.
- Improved detector allows for better spatial resolution.
- Designed for whole-body oncology and neurology exams.

• Patient Comfort:

- Weight capacity of 500 lbs.
- Shorter tunnel for easier patient positioning.

Clear Results, Compassionate Care
