

JOHNS HOPKINS

MEDICAL IMAGING

Pediatric Services

Our team understands that children need options specifically designed for them. With that in mind, our locations offer radiation-free and low-dose imaging options and our pediatric radiologists and pediatric neuroradiologists exclusively read images for patients under 18 years.

Please note that age limits can vary depending on the child and the child's ability to meet "holding still" requirements. **For any patients who do not meet the requirements below or need general anesthesia or specialized child life assistance, a team of specialists is available at the Bloomberg Children's Center at The Johns Hopkins Hospital in Baltimore, MD.**

Exam	Location Availability
X-Ray	Available at all locations.
Ultrasound	Available at all locations except for: Baby hips, neonatal spines, and neonatal brains exams, only available at Green Spring Station & White Marsh with limitations, details available online.
