

ACHONDROPLASIA – HEIGHT

5th, 50th, and 95th percentiles for height for children with achondroplasia (solid lines) compared to height growth curves for the general population (dotted lines). Based on 1,955 observations from 162 boys and 131 girls with achondroplasia. From Hoover-Fong JE, et al. *Am J Clin Nutr*. 2008;88:364-371.
