

ACHONDROPLASIA – HEIGHT

95th percentiles for height for children with achondroplasia (solid lines) compared to height growth curves for the general population (dashed lines) on 1,955 observations from 162 boys and 131 girls with achondroplasia. From Hoover-Fong, JE, et al. *Am J Clin Nutr*. 2008;88:364-371. Figures for Nutrition, used with permission. John McGready, Kerry Schulze, Charles Scott, and Julie Hoover-Fong are gratefully acknowledged. Curves for U.S. population from Kuczmarski R.J., et al. *Vital Health Stat 11*. 2002;(246):1-190.
