

## Johns Hopkins Howard County Medical Center

From its beginnings as the Columbia Hospital and Clinics Foundation in 1973, Johns Hopkins Howard County has evolved into a 226-bed, comprehensive, acute-care medical center specializing in women's and children's services, surgery, cardiology, oncology, orthopaedics, gerontology, psychiatry, emergency services and community health education.

### Nationally and Internationally Recognized Care

Johns Hopkins Howard County Medical Center has been recognized by several national organizations for its initiatives to enhance clinical excellence. The hospital has also been recognized by the American Heart Association/American Stroke Association Get With The Guidelines Stroke Gold Plus Award, Stroke Honor Roll Target: Type 2 Diabetes Honor Roll, Lifeline STEMI Receiving Center Gold Achievement Award and NSTEMI Gold Achievement Award.

### Part of a Premier, Integrated System

Howard County Medical Center is a member of Johns Hopkins Medicine, one of the world's premier, integrated health systems, with six hospitals, four community-based health care and surgery centers, over 50 primary health care sites throughout Maryland, managed care and home care services, and numerous overseas affiliates and management agreements.

Among Johns Hopkins Howard County Medical Center's specialty services are:

### Women's Services and Obstetrics

- The labor and delivery unit features 12 delivery rooms that provide comfort and privacy in the safety of the hospital's technologically advanced environment.
- Our specially designed postpartum unit has 34 beds.
- The center for Maternal and Fetal Medicine provides comprehensive, multidisciplinary management of high-risk pregnancies.

### Pediatrics

- The medical center's comprehensive pediatric unit provides emergency, observational and inpatient services for more than 20,000 children each year.
- In the 18-bed, state-designated level III+ neonatal intensive care unit, part of the Maryland Institute for Emergency Medical Services Systems, critically ill newborns receive care from Johns Hopkins neonatologists and specially trained registered nurses.

### Intensive Care

- This highly specialized unit is dedicated to the needs of adults requiring intensive monitoring and care services involving cardiac, medical and surgical care.

### Cancer Services

- The Breast Center offers a variety of diagnostic and treatment options.
- The Claudia Mayer/Tina Broccolino Cancer Resource Center provides support for cancer patients, including a resource library and support groups, as well as hair and skin products, wigs and prostheses.

### Outpatient Rehabilitation

- We provide comprehensive treatment for a variety of adult diagnoses, including Parkinson's disease, stroke, traumatic brain injury and more.
- Outpatient cardiac and pulmonary rehabilitation programs offer patients individualized regimens of exercise, education, and coping and support skills.

### Other Specialty Services

- At the Center for Wound Healing, our multidisciplinary approach uses the most advanced tools for the diagnosis and treatment of nonhealing wounds.
- The psychiatric emergency unit, a separate, secure unit, is designed and staffed to treat patients in need of mental health services.
- The Joint Academy, a comprehensive program for total joint replacement surgery, creates a partnership among the patient, doctor and hospital.
- We are proud of our Maryland Institute for Emergency Medical Services Systems designation as a Cardiac Interventional Center, Primary Stroke Center and a Perinatal Referral Center.
- We provide services and programs outside of the hospital to meet the needs of people where they are, such as school-based telemedicine, coordinated access to outpatient stabilization for urgent behavioral health issues and transition support for continued treatment, and a faith-based initiative to empower people to manage their health.
- The Community Care Team, which works with patients and families to ensure a smooth hospital-to-home transition, coordinates clinical care and ensures community-based supports are in place to help patients improve their health and reduce the likelihood of preventable hospital readmission.
- Our health promotion and education programs help residents take charge of their health and help others. Areas include managing chronic disease, mother-baby education and assisting with a mental health crisis.
