JOHNS HOPKINS
SCHOOL of MEDICINE

Call for Applicants: General Academic Pediatrics Fellowship at Johns Hopkins

NIH and HRSA-funded T32 postdoctoral training program in pediatric research

The General Academic Pediatrics Fellowship program in the Johns Hopkins Division of General Pediatrics has a decades-long track record of training leaders in pediatric research. The program has an emphasis on primary care, pediatric population health, and prevention science. Other areas of focus include school-based health care, quality improvement, primary care policy, obesity prevention, telehealth, immigrant and refugee health, and implementation science. The program is accredited by the Academic Pediatric Association.

PROGRAM OVERVIEW

The fellowship is housed in the Johns Hopkins School of Medicine Department of Pediatrics, Division of General Pediatrics, but draws on resources and faculty expertise from across Johns Hopkins University (e.g., Bloomberg School of Public Health, School of Nursing, School of Education, Krieger School of Arts & Sciences). Fellows receive research training, structured mentorship, coursework, and protected time to develop an independent program of scholarship. Physician fellows maintain a limited clinical role, typically 20% effort. The curriculum emphasizes primary care prevention and implementation science, rigorous research design, community-engaged approaches, advocacy, research ethics, and career development (e.g., grant writing, job search support). The program is tailored to each fellow's interests, career goals, and prior training.

KEY PROGRAM ACTIVITIES

- Fellows devote at least 80% of their time to research training over **either 2 or 3 years**
- Longitudinal, **intensive mentorship** by experienced researchers is coupled with a **core curriculum** (including research methods, community participatory approaches, advocacy, and career development) to ensure fellows have the skills and resources they need to be successful after fellowship
- Coursework leading to a **master's degree in public health at the Bloomberg School of Public Health** or a master's degree in Health Sciences Informatics in the School of Medicine.
- Physician fellows precept residents in the Harriet Lane Clinic or the Bayview Children's Medical Practice; clinical work in school-based health centers is also possible.
- Participation in national, regional, and local professional meetings and support for networking
- Collaborative scholarship oversight process brings together mentors and advisors to support progress

WHY HOPKINS?

- A track record of **producing leaders in academic pediatrics since 1978**
- The Johns Hopkins **Bloomberg School of Public Health,** consistently ranked #1 in the US, is a rich resource for our trainees; many General Pediatrics faculty have joint appointments, teach classes, and mentor students in the School of Public Health
- **Collaboration** with fellows in programs including Pediatric Hospitalist Medicine, General Internal Medicine, Adolescent Medicine, and public health creates a vibrant community of learners

ELIGIBILITY & COMPENSATION

Minimum requirements include satisfactory completion of an ACGME-accredited pediatrics or medicine-pediatrics residency program OR graduation from a PhD or other doctoral program (e.g., psychology, public health) as well as US citizenship or permanent residency. Fellows receive a stipend and health insurance, tuition for a master's degree in public health (where applicable) or other coursework, and an allowance for travel and related expenses.
