Medicare Part B: Advanced Biosimilars First	<input type="checkbox"/>

Exceptions Criteria

Alpha1-Proteinase Inhibitors

This document informs prescribers of preferred products and provides an exception process for targeted products through prior authorization.

These criteria were developed to align with the following: Standard Control Formulary (SF), Standard Control Choice Formulary (SCCF), Advanced Control Specialty Formulary (ACSF), Advanced Control Specialty – Choice Formulary (ACSCF), Medical Benefit, and Managed Medicaid Medical Benefit (MMMB).

Plan Design Summary

This program applies to the alpha1-proteinase inhibitor products specified in this document. Coverage for targeted products is provided based on clinical circumstances that would exclude the use of the preferred product and may be based on previous use of a product. The coverage review process will ascertain situations where a clinical exception can be made. This program applies to all members requesting treatment with a targeted product.

Each referral is reviewed based on all utilization management (UM) programs implemented for the client.

Table. Alpha1-Proteinase Inhibitor Products

Medications considered formulary or preferred on your plan may still require a clinical prior authorization review.

Reference number(s)
5876-D

	Products
Preferred	<ul style="list-style-type: none"> • Prolastin-C (alpha1-proteinase inhibitor [human]) • Zemaira (alpha1-proteinase inhibitor [human])
Target	<ul style="list-style-type: none"> • Aralast NP (alpha1-proteinase inhibitor [human]) • Glassia (alpha1-proteinase inhibitor [human])

Exception Criteria

This program applies to members requesting treatment for an indication that is FDA-approved for the preferred product.

Coverage for a targeted product is provided when the member has had a documented intolerable adverse event to both of the preferred products, and the adverse event was not an expected adverse event attributed to the active ingredient as described in the prescribing information.
