## Lyfgenia

### Products Referenced by this Document

Drugs that are listed in the following table include both brand and generic and all dosage forms and strengths unless otherwise stated. Over-the-counter (OTC) products are not included unless otherwise stated.

Brand Name	Generic Name
Lyfgenia	lovotibeglogene autotemcel

### Indications

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

#### FDA-approved Indications<sup>1</sup>

Lyfgenia is indicated for the treatment of patients 12 years of age or older with sickle cell disease and a history of vaso-occlusive events.

#### Limitations of Use

Following treatment with Lyfgenia, patients with  $\alpha$ -thalassemia trait ( $-\alpha^{3.7}/-\alpha^{3.7}$ ) may experience anemia with erythroid dysplasia that may require chronic red blood cell transfusions. Lyfgenia has not been studied in patients with more than two  $\alpha$ -globin gene deletions.

All other indications are considered experimental/investigational and not medically necessary.

### Documentation

Submission of the following information is necessary to initiate the prior authorization review:

Reference number(s)
6292-A

- Molecular or genetic testing results documenting sickle cell disease genotype
- Chart notes or medical records documenting history of severe vaso-occlusive episodes

## Prescriber Specialties

This medication must be prescribed by or in consultation with a hematologist.

## Coverage Criteria

### Sickle Cell Disease<sup>1-3</sup>

Authorization of 3 months for one dose total may be granted for sickle cell disease when all of the following criteria are met:

- Member is 12 years of age or older
- Member has a diagnosis of sickle cell disease with one of the following genotypes confirmed by molecular or genetic testing:
  - $\beta^s/\beta^s$
  - $\beta^s/\beta^0$
  - $\beta^s/\beta^+$
- Member has a documented history of at least 2 severe vaso-occlusive episodes per year during the previous two years (see Appendix for examples)
- Member is eligible for a hematopoietic stem cell transplant (HSCT) but is unable to find a human leukocyte antigen (HLA)-matched related donor
- Member has not received a prior hematopoietic stem cell transplant (HSCT)
- Member has not received Lyfgenia or any other gene therapy previously
- Member does not have more than two  $\alpha$ -globin gene deletions
- Member meets one of the following:
  - Has experienced, at any time in the past, an inadequate response or intolerance to a trial of hydroxyurea
  - Has a contraindication to hydroxyurea

## Appendix<sup>1-3</sup>

### Examples of Severe Vaso-Occlusive Events

- Acute pain event requiring a visit to a medical facility and administration of pain medications (opioids or intravenous [IV] non-steroidal anti-inflammatory drugs [NSAIDs]) or RBC transfusions

Reference number(s)
6292-A

- Acute chest syndrome
- Priapism lasting > 2 hours and requiring a visit to a medical facility
- Splenic sequestration
- Hepatic sequestration
