# SPECIALTY GUIDELINE MANAGEMENT

# SYNRIBO (omacetaxine mepesuccinate)

## POLICY

#### I. INDICATIONS

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

A. FDA-Approved Indication

Synribo is indicated for the treatment of adult patients with chronic or accelerated phase chronic myeloid leukemia (CML) with resistance and/or intolerance to two or more tyrosine kinase inhibitors (TKIs).

- B. Compendial Uses
  - 1. Treatment of advanced phase CML for patients with disease progression to accelerated phase
  - 2. Follow-up therapy for CML patients after hematopoietic stem cell transplant (HSCT)

All other indications are considered experimental/investigational and not medically necessary.

#### **II. DOCUMENTATION**

Submission of the following information is necessary to initiate the prior authorization review: Prior to initiation of therapy, results of cytogenetic and/or molecular testing for detection of the Ph chromosome or the BCR::ABL gene

#### **III. CRITERIA FOR INITIAL APPROVAL**

#### Chronic Myeloid Leukemia (CML)

Authorization of 12 months may be granted for treatment of CML confirmed by detection of the Ph chromosome or BCR::ABL gene by cytogenetic and/or molecular testing when all of the following criteria are met:

- 1. Member meets any of the following:
  - a. Member has chronic or accelerated phase CML
  - b. Member has received HSCT for CML
- 2. Member has experienced resistance or intolerance to two or more tyrosine kinase inhibitors (TKIs) (e.g., bosutinib, dasatinib, imatinib, nilotinib, ponatinib)
- 3. The requested medication is used as a single agent

# **IV. CONTINUATION OF THERAPY**
