

Provider Update

This update contains pertinent information about changes that will impact the Johns Hopkins HealthCare provider network.

Guidance on the Continuation of Telehealth For Priority Partners Therapy Services

Effective Date: Oct. 7, 2021

Line of Business Affected: Priority Partners

Type of Change: Benefit

Explanation of Change:

The passing of Senate Bill 3 (the Preserve Telehealth Access Act of 2021) allows Maryland Medicaid and MCOs such as Priority Partners to continue to reimburse for services appropriately rendered via telehealth.

Here is the [list of procedure codes for therapy services*](#) that the Maryland Department of Health (MDH) will continue to reimburse for providers when administered via audio-visual telehealth. Services must be identified and billed using the GT modifier to indicate a telehealth delivery model. MDH will not reimburse for services provided via an audio-only delivery model or for codes not included on this [list](#) when provided via any method of telehealth.

Please note that code 92523 with -52 GT Modifier is now approved for reimbursement.
