

Billing Information for Noninvasive Prenatal Testing (NIPT)/Cell-free DNA screening

The labs listed below perform noninvasive prenatal testing. If you would like to inquire regarding insurance coverage for these tests in advance of your appointment, please use CPT codes listed. You will also be provided with billing department contact information for the specific laboratory selected at the time of your appointment. Of note, the particular test ordered by our providers is dependent upon clinical indication, as not all tests are equivalent. If indicated, you will be provided with a test requisition form at the time of your appointment. Specific diagnosis codes (ICD-10 codes) will vary depending on your particular clinical situation; however, common ICD-10 codes are listed for your convenience.

Laboratories:

- Labcorp: MaterniT21Plus test – CPT code: 81420
- Quest: QNatal Advanced test – CPT code: 81420
