

Johns Hopkins All Children's Hospital Customer Service Center

The Call Center has merged with the scheduling teams for our clinics and radiology to become the Customer Service Center, making it easier for families to schedule appointments and make requests of clinic staff with just one call, and for community physicians to connect with sub specialists. The Customer Service Center also includes the Physician Access Line, R.N. Triage Line and the hospital switchboard.

By calling the main number to our hospital, or a specific sub specialty office, you will reach one of our customer service representatives to assist.

Main hospital: 727-898-7451
