

INTERNSHIP PROGRAM TABLES

Date Program Tables are updated: 8/1/26

Program Disclosures

As articulated in Standard I.B.2, programs may have “admission and employment policies that directly relate to affiliation or purpose” that may be faith-based or secular in nature. However, such policies and practices must be disclosed to the public. Therefore, programs are asked to respond to the following question.

Does the program or institution require students, trainees, and/or staff (faculty) to comply with specific policies or practices related to the institution’s affiliation or purpose? Such policies or practices may include, but are not limited to, admissions, hiring, retention policies, and/or requirements for completion that express mission and values.	☐ Yes ☒ No

Internship Program Admissions

Date Program Tables are updated: August 1, 2026

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on intern selection and practicum and academic preparation requirements:

We strive to recruit interns who are prepared to meet the challenges of this internship. As such, we seek interns who have a strong background in at least one of the following areas: autism/neurodevelopmental disabilities, pediatric neuropsychology, or pediatric psychology. Successful applicants are expected to possess training and experience that is consistent with Health Service Psychology. That is, we select interns who have didactic training and supervised experience in the nine Profession Wide Competencies. We attempt to recruit interns from doctoral programs that emphasize empirical, data-based approaches to the practice of psychology. We expect that successful applicants have experience using the scientific literature to develop assessment and treatment strategies and we evaluate the applications accordingly. Particular attention is paid to the extent to which the applicant has received supervised practica experience with children and families in the areas listed above.

Does the program require that applicants have received a minimum number of hours of the following at time of application?

Total Direct Contact Intervention Hours	Yes, minimum of 300 hours
Total Direct Contact Assessment Hours	Yes, minimum of 300 hours

Describe any other required minimum criteria used to screen applicants:

Applicants should be from APA- or CPA-accredited programs in clinical, school, or counseling psychology. Applicants with strong backgrounds in child clinical or pediatric psychology are preferred. Applicants should have completed at least three years of practicum/field placement in both psychological or neuropsychological assessment as well as intervention; have accumulated a minimum of 300 hours in intervention and a minimum of 300 hours in assessment; and have written at least six integrated testing reports. Applicants should be accepted into doctoral candidacy, and their dissertation proposal must be defended before the start date of the internship training year. Immediately prior to the start of the internship year, drug testing and a criminal and background check will be completed for each intern. In order to start the internship, the results from the drug test and criminal and background check must meet Johns Hopkins All Children's Hospital requirements for working with patients. Applicants who are not U.S. citizens must be eligible for and receive a U.S. visa for the internship year. The internship program abides by Johns Hopkins All Children's Hospital policy as an Equal Opportunity Employer

Financial and Other Benefit Support for Upcoming Training Year

Annual Stipend/Salary for Full-time Interns	\$31,678	
Annual Stipend/Salary for Half-time Interns	N/A
