

# The Johns Hopkins Cochlear Implant Center

## Cochlear Implant / Hybrid Implant Candidacy

**S** = Hybrid audiogram guidelines

**M** = Full array cochlear implant guidelines

- Cochlear implant candidacy is based on speech understanding. If you see someone in clinic that is struggling with hearing aids and <60% word recognition, this indicates cochlear implant candidacy.
- Hybrid candidates: <60% word recognition in the ear to be implanted, <80% in the opposite ear.
