

# The Johns Hopkins Rehabilitation Network and University of Delaware Neurologic Physical Therapy Residency Program

## This program aims to advance physical therapists who will:

- Provide innovative and evidence-based care to the neurologic population in different clinical settings.
- Advocate for and advance the integral role of physical therapy and rehabilitation in the management and prevention of impairments.
- Possess system skills such as outcome measurement, quality improvement, project management and leadership within an interdisciplinary team.
- Act as strong patient and family advocates.
- Qualify to sit for the ABPTS certification exam in neurologic physical therapy.

## Program benefits:

- Salary and full-time benefits
- One-on-one clinical mentoring
- Variety of unique didactic experiences
- Opportunity to participate in quality improvement training and clinical education
- Leadership skill development

## Details:

*This 12½ month residency experience encompasses clinical work, didactic experiences and quality improvement exposure each week, including:*

- Evaluation and treatment of the complex neurologic patient in acute care, inpatient rehabilitation and outpatient settings.
- Structured learning opportunities with physicians and medical professionals in areas such as vestibular, ALS, neurologic spine, EMG and orthotics/prosthetics.
- Participation in scholarly activity and evidence-based practice.
- Mentorship in student instruction in the clinic and classroom in the University of Delaware DPT Program.
- Participation in formal quality-improvement training.

**Prerequisites:** *an applicant must be a graduate from an accredited physical therapy program and have valid Maryland and Delaware physical therapist licenses or be eligible to obtain them prior to the start of the program.*
