

Physical therapists Emily Lo and Lisa Ronayne are mobilizing a patient following a knee replacement in the rehabilitation clinic using the motorized gait system.

## INSTITUTE FOR BONE AND JOINT HEALTH

Expanding a long-standing reputation for orthopaedic leadership

Our new orthopaedic unit, including its own large, state-of-the-art rehabilitation clinic, further advances Sibley's highly respected program known for innovative techniques, experienced surgeons and nurses and expertise in a variety of complex procedures.

>>> Take a video tour of our new orthopaedic unit at: [Sibley.org/orthopaedics](http://Sibley.org/orthopaedics)

- 50 all-private rooms with 55-inch flat screen HDTVs and sleep sofas
- Excellent surgical outcomes with readmission rates lower than the national average
- Perform over 1,000 hip and knee replacements annually with low surgical infection rates
- The Morris and Gwendolyn Cafritz Foundation Clinic, a large state-of-the-art rehabilitation clinic, fully equipped for every aspect of orthopaedic recovery, is an integral part of the unit.
- Lifts assist patients with mobility.
- Recovering patients train and practice self-care and household tasks in the occupational therapy area's full kitchen and bathroom.
- The physical therapy treatment area includes an advanced motorized gait system, which allows patients to safely practice and regain walking and balance.

Occupational therapist Julie Johnson working on kitchen tasks with a patient in the occupational therapy treatment area.
