Approved October 25, 2018

Healthy volunteers age 50-80 are needed for a skin microbiome research study

Participation Requires:

- Healthy volunteers age 50-80 with no significant past medical history and no medications
- Avoid antibacterial products for 7 days before sampling
- No shower 24 hours before sampling

Participation Involves:

1 clinic visit (~30 minutes) including:

- Skin exam
- Skin swabbing
- Skin photographs—will be de-identified
- No compensation
