CLINICAL ACTIVITIES

Clinical Focus

My practice and care of patients is dedicated to excellent patient care of older adults with complex care needs, through proper assessment and management that aligns treatment plans with carefully ascertained patient-centered goals of care. My priorities: perform consistent comprehensive geriatric assessment, always explore goals of care and incorporate that along with realistic estimates of outcomes and prognosis. Communication is critical – within the interdisciplinary team as well as the patient-family unit. I always consider the long-term implications of care decisions and how those could impact end-of-life scenarios. I have an outstanding record of managing my practice in a way that minimizes the amount time spent in hospital and in nursing homes (when aligned with patient goals) and ensuring that care at the end of life is of the highest quality possible. I have superior practice benchmarks for hospital and nursing home utilization, number of prescribed medications and patient satisfaction scores compared to the national average for PACE providers. I am the medical director of Hopkins ElderPlus, the only Program of All-Inclusive Care for the Elderly (PACE) in Maryland.

Certification

Medical, other state / government licensure

Clinical (Service) Responsibilities

1999-2001 Medical Director, Lorien Frankford Nursing and Rehabilitation Center, Baltimore, MD

2000-2001	Associate Medical Director, Hopkins ElderPlus (Program of All-Inclusive Care for the Elderly), Baltimore, MD
2001-present	Medical Director, Hopkins ElderPlus (Program of All-Inclusive Care for the Elderly), Baltimore, MD
2000-2006	Medical Director, Eastpoint Rehabilitation and Nursing Center, Baltimore, MD
2000-2001	Medical Advisor, Brighton Gardens Assisted Living, Pikesville, MD
2002-2003	Medical Director, Beacham Adult Day Care Center, Johns Hopkins Geriatrics Center
2004-2007	Volunteer Physician, Caroline Street Clinic for the Uninsured, Baltimore, MD
2020	Geriatrician member, Hopkins Go Team (Emergency response missions to provide assessments and support to skilled nursing facilities in Maryland during COVID 19)

Clinical Productivity

2001-present	I am the Medical Director of Hopkins ElderPlus (enrollment = 150) and provide oversight to the primary care providers within that program. Because HEP is a capitated health plan, there are no targets for “number of patient encounters”; rather, case management of the entire panel is a priority.

EDUCATIONAL ACTIVITIES

Teaching

Educational Focus

My educational focus is the post-doctoral fellows in geriatric medicine. I have been a primary educator with the fellowship program since I began at Hopkins in 1998, and I have been program director since 2006. I believe it is my calling to demonstrate outstanding skills and knowledge in the care of older adults and to align trainees with outstanding mentors, whether that might be clinical care, research, education or policy. It give me great satisfaction that so many of our fellows have become leaders in the field of geriatrics, including highly effective academic geriatricians. I have made it a priority for the PACE program to be a primary teaching site for learners of all levels (medical students, residents and fellows as well as learners of other disciplines). This is where I demonstrate the interdisciplinary care process in action and inspire them to work collaboratively. I approach everyday as an opportunity to expand the knowledge and performance of trainees, as well as my peers.

RESEARCH ACTIVITIES

Research Focus

My research focus is the evaluation of models of care which care for older adults with complex and chronic care needs. This includes community-based models such as the Program of All-Inclusive Care for the Elderly (PACE), as well as facility-based care including assisted living and nursing homes. I collaborate with other geriatricians at the Johns Hopkins Center for Transformative Geriatric Research, the National PACE Association as well as geriatric psychiatry colleagues at Johns Hopkins who specialize in dementia care.

SYSTEM INNOVATION AND QUALITY IMPROVEMENT ACTIVITIES

System Innovation Focus

I focus on improving health status and quality of life for patients with high risk of requiring hospital or nursing home care. These patients typically have multiple medical problems and most have dementia. I was involved in generating a collaborative program to structure and improve the care of those patients. This program includes early recognition of medical needs that might compromise community living. I have also focused on care that improves recognition and care for these patients during transition to end of life. I have focused much of my effort to enhance collaboration within the interdisciplinary team (IDT).
