The Johns Hopkins University School of Medicine

Post-Doctoral Fellow, Center for Functional Anatomy & Evolution

The Center for Functional Anatomy & Evolution (https://www.hopkinsmedicine.org/FAE/) invites applicants for a full-time, two-year post-doctoral fellowship. Primary responsibilities include participating in the teaching of an eight-week dissection-based course in clinically oriented human gross anatomy and maintaining active research within the Center. Preferred candidates will: 1) hold a Ph.D. or equivalent degree by the start date, 2) demonstrate an ability and enthusiasm for teaching human anatomy to pre-clinical medical and biomedical graduate students, and 3) conduct research that complements the interests of the Center’s faculty and graduate students. Research fields that would be considered include, but are not limited to, comparative/functional anatomy, clinical anatomy, evo/devo, systematics/comparative methods, biological anthropology, and vertebrate paleontology.

To apply, please send a cover letter, curriculum vitae, statement of research, and contact information for three professional references to Danielle Edwards anatomyed@jhmi.edu. Questions concerning the position should be directed to Dr. Gabriel Bever (gbever1@jhmi.edu). Please reference FAE_postdoc in the subject line of any email. Applications submitted by April 1st, 2021 will receive full consideration. The projected start date is July 1, 2021.

The Johns Hopkins University is an equal opportunity employer committed to workforce diversity.
