The Johns Hopkins School of Medicine Division of General Internal Medicine is recruiting highly motivated BC/BE internal medicine physicians interested in a career in academic primary care and/or academic hospital medicine (Hospitalists).

Recent graduates interested in developing into outstanding clinicians are encouraged to apply. In addition to providing primary care to a diverse population, faculty within the Division have developed specialized clinical programs dedicated to cancer survivorship, hypertension, weight management, diabetes prevention, transgender care, and care of special needs patients as they transition from pediatric to adult medicine. Clinical mentorship for applicants to establish expertise in any of these areas exist, if desired. Additionally, faculty may be able to spend a portion of their clinical time seeing patients in GIM affiliated clinics such as the Johns Hopkins Executive & Preventive Health Program, the Johns Hopkins After-Care Clinic, and University Health Services.

A majority of the faculty members’ time will be spent at the Johns Hopkins Greenspring Station practice site in Lutherville, MD. The practice operates through a team-based model that brings together physicians, nurse practitioners, nurses, case managers, medical assistants, behavioral health specialists, and front-line staff to provide the highest quality care to its patients. Participation in quality and safety initiatives, teaching of medical students and residents, and research projects is encouraged.

Hospitalists in the Division of GIM provide care to inpatients at Johns Hopkins Hospital in both direct care and resident-covered services. As faculty, Hospitalists are encouraged to engage in research, quality improvement, high-value care initiatives, and resident/medical student teaching.

Interested individuals should email a cover letter and copy of their CV to:

Bimal Ashar, MD, MBA (primary care)  
Bashar1@jhmi.edu

Daniel Brotman, MD (hospital medicine)  
brotman@jhmi.edu

The successful candidate(s) for this position will be subject to a pre-employment background check.

If you are interested in applying for employment with The Johns Hopkins University and require special assistance or accommodation during any part of the pre-employment process, please contact the HR Business Services Office at jhurecruitment@jhu.edu. For TTY users, call via Maryland Relay or dial 711.

The following additional provisions may apply depending on which campus you will work. Your recruiter will advise accordingly.

During the Influenza ("the flu") season, as a condition of employment, The Johns Hopkins Institutions require all employees who provide ongoing services to patients or work in patient care or clinical care areas to have an annual influenza vaccination or possess an approved medical or religious exception. Failure to meet this requirement may result in termination of employment.
The pre-employment physical for positions in clinical areas, laboratories, working with research subjects, or involving community contact requires documentation of immune status against Rubella (German measles), Rubeola (Measles), Mumps, Varicella (chickenpox), Hepatitis B and documentation of having received the Tdap (Tetanus, diphtheria, pertussis) vaccination. This may include documentation of having two (2) MMR vaccines; two (2) Varicella vaccines; or antibody status to these diseases from laboratory testing. Blood tests for immunities to these diseases are ordinarily included in the pre-employment physical exam except for those employees who provide results of blood tests or immunization documentation from their own health care providers. Any vaccinations required for these diseases will be given at no cost in our Occupational Health office.
